

Seaming Machines – Round Cans

When it comes to preserving the highest quality food products in containers, Pacmac's line of semi-automatic and automatic seamers set the benchmark with industry leading standards for double seam uniformity, integrity, and ultimate shelf life. The rotating head design maintains a stationary can during the seaming operation, thus minimizing product distur-

bance and spillage. With the ability to accommodate a range of container sizes, Pacmac's seamers provide exceptional product flexibility to the user. In addition, features such as auto end feed and integrated can feed dial allow for automated operation without human intervention, providing hygienic conditions for the product.
